Career Objective

Recent B.Tech Information Technology graduate with hands-on experience in Python, Django, Django REST Framework, REST API development, and backend web application development through internships and academic projects. Proficient in building secure APIs using JWT Authentication, Role-Based Access Control (RBAC), and working with relational databases. Seeking a Junior Python Developer opportunity to contribute to scalable backend solutions while continuously enhancing my software development skills.

Technical Skills

Programming:	Python, JavaScript, SQL
Backend:	Django, Django REST Framework (DRF), REST API Development
Authentication:	JWT Authentication, Role-Based Access Control (RBAC)
Databases:	PostgreSQL, SQLite, Django ORM
Tools:	Git, GitHub, Postman, VS Code
Web Technologies:	HTML5, CSS3, REST APIs, JSON
Concepts:	Object-Oriented Programming (OOP), API Security, Input Validation, Debugging, SDLC, Agile

Internship Experience

Python Developer Intern — Zecser Business LLP (Remote) *June 2026 – Present*

- Developed backend modules using Python, Django, and Django REST Framework.
- Designed and implemented secure REST APIs with JWT Authentication.
- Worked with PostgreSQL and Django ORM for database operations.
- Implemented Role-Based Access Control (RBAC) for user authorization.
- Performed API testing using Postman and validated API responses.

Web Development Intern — District Administration, Idukki, Kerala *Jun – Jul 2025*

- Assisted in testing web application functionality.
- Worked with REST APIs, databases, and debugging activities.
- Validated application features and supported defect resolution.
- Collaborated with team members throughout the software development lifecycle.

Projects

CCTV Intel – Prompt-Based Object Detection System

Tech: Python, Computer Vision, Object Detection, NLP

- Developed an AI-powered surveillance application using Python.
- Performed testing and validation of image and video processing modules.
- Debugged application functionality and improved detection accuracy.
- Verified API responses and backend functionality during development.

Campus Genie – Full Stack College Management System

Tech: Python, Django, DRF, PostgreSQL, JWT

- Developed a role-based college management system using Django and Django REST Framework.
- Built RESTful APIs with JWT Authentication and RBAC.
- Designed backend modules for leave management and certificate requests.
- Integrated PostgreSQL using Django ORM.

Relevant Coursework

Data Structures, Object-Oriented Programming, Database Management Systems, Software Engineering, Web Technologies, Computer Networks

Education

B.Tech – Information Technology — Government Engineering College, Idukki, Kerala *Graduated: May 2026*
