

FATHIMA SAJA P

QA / Software Tester Trainee

+91 8848655053 — fathimasajap125@gmail.com — github.com/FATHIMASAJA-P/ — linkedin.com/in/fathimasajap

Career Objective

Recent B.Tech Information Technology graduate with hands-on experience in Python, REST APIs, SQL, and web application development through internships and academic projects. Passionate about Software Quality Assurance with knowledge of Manual Testing, SDLC, STLC, API Testing, Test Case Design, Bug Reporting, and Selenium (Basic). Eager to contribute to software quality while continuously learning modern testing methodologies and automation tools.

Technical Skills

Testing:	Manual Testing, Functional Testing, Regression Testing, Integration Testing, User Acceptance Testing (UAT), Test Case Design, Test Scenario Creation, Bug Reporting, API Testing (Postman), Selenium (Basic)
QA Concepts:	SDLC, STLC, Bug Life Cycle, Defect Management, Test Planning, Test Execution
Programming:	Python, SQL
Web Technologies:	HTML5, CSS3, JavaScript, Django, REST APIs
Databases:	MySQL, MongoDB
Tools:	Git, GitHub, Postman, VS Code, Jira (Basic), Browser Developer Tools
Concepts:	OOP, Debugging, Problem Solving, Cross Browser Testing (Basic)

Internship Experience

Python Developer Intern — Zecser Business LLP (Remote) *June 2026 – Present*

- Developed backend modules using Python and Django.
- Performed API testing using Postman and verified REST API responses.
- Debugged backend issues and validated application functionality, and reported defects.
- Collaborated with developers using Git and Agile development practices.

Web Development Intern — District Administration, Idukki, Kerala *Jun – Jul 2025*

- Assisted in testing web application functionality.
- Worked with REST APIs, databases, and debugging activities.
- Validated application features and supported defect resolution.
- Collaborated with team members throughout the software development lifecycle.

Projects

CCTV Intel – Prompt-Based Object Detection System

Tech: Python, Computer Vision, Object Detection, NLP

- Developed an AI-powered surveillance application using Python.
- Performed testing and validation of image and video processing modules.
- Debugged application functionality and improved detection accuracy.
- Verified API responses and backend functionality during development.

Campus Genie – Full Stack College Management System

Tech: Django, MongoDB, JavaScript, REST APIs

- Developed a role-based web application using Django.
- Designed and executed test scenarios to validate application modules and user workflows.
- Implemented REST APIs and backend functionality.
- Debugged issues and improved application reliability.

Relevant Coursework

Software Testing, Software Engineering, Database Management Systems (DBMS), Object-Oriented Programming (OOP), Web Technologies, Data Structures

Education

B.Tech – Information Technology — Government Engineering College, Idukki, Kerala *Graduated: May 2026*
